Selbstvorstellung

As an International student with experience such as: Four years of being field representative in a foreign country during my bachelors, Team lead medalist in the field of science and a teaching career spanning for more than seven years, I have extensive knowledge of solving issues and streamlining work both on an administrative and personal level, and the familiarity with different groups & ages of people combined with my vast connection of friends and professional colleagues around the world gives me the perspectives to help Wuerzburg University to receive and integrate incoming students better and to help international students on a detailed case by case extent. Having already started centralizing and helping the students in my field from one month before arriving in Wuerzburg University by creating a foundation for International students and the university, I'll be happy to continue our growing effort with our friends at Fachschaftsvertretung and the existing support of faculty staff to establish a first time full international assist and integration help, bringing both national and international students together to push for the already existing good ideas to come to

fruition under unison.
