## **Selbstvorstellung**

Hi! My name is Sude Yaren Öztürk. I completed my BSc in Molecular Biology and Genetics at İzmir Institute of Technology (Türkiye) and started my MSc in Translational Neuroscience at the University of Würzburg this year. During my undergraduate studies, I took on leadership roles in student-led scientific communities and helped organize national and international conferences. I also worked as a writer and team leader for science communication platforms. I'm excited to connect with fellow neuroscience enthusiasts, exchange ideas, and contribute to the neuroscience community at Würzburg!

**Aus der Gremienübersicht:** (geändert vom Vorsitz!)

If I understood correctly, you're asking about groups I've previously been involved in. I have been active in student scientific communities, conference organizing committees, and science communication teams. I

served as Vice President/Assistant Manager and Communications Director at YAB?TO, founded B?LFEST, and worked as a Content Team Lead at Gelecek Bilimde. I would also love to take an active role in SNN, contribute to its activities, and connect with other neuroscience enthusiasts!
